## Lighting for a better tomorrow

Modern lifestyle is creating spaces that need lighting up in creative ways. Light is not just a source anymore to brighten up your home, it is a transformative power that is changing the appearance of indoor and outdoor spaces from homes to highways as well as commercial to entertainment spaces.

Eveready, with an eye on the future is bringing luminaires that are energy efficient with no UV/IR effects, that blend seamlessly with the environment creating a soothing ambience. Less energy consumption means lesser carbon and greenhouse gas emission along with longer product life.

Our end-to-end comprehensive range of professional lighting solution optimises productivity, maximises power saving and saves the environment. Maintaining efficiency is at the heart of everything we do. Our belief in this value system, directs, determines and drives all our efforts in creating trust, quality and energy efficiency.

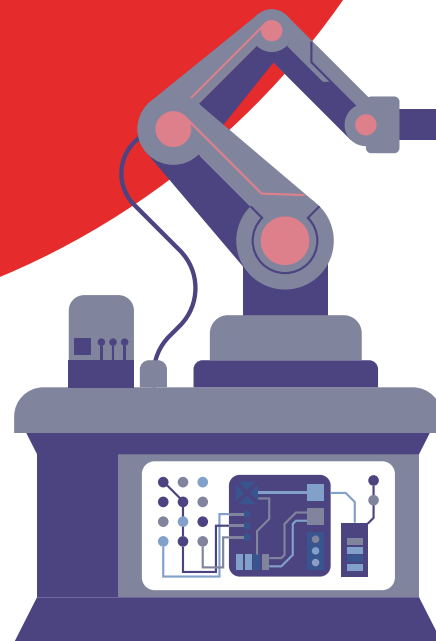

As we power ahead towards the future, we will continue to improve the quality of life of our customers through cutting edge lighting solutions and strengthen the timeless appeal of our brand. We are committed to light up the path for tomorrow's generations.

Product testing and quality control are the key elements on which product efficiency, performance and life depends. **EVEREADY Professional Lighting** team understands and values these attributes and hence has invested in a full-fledged, state-of-the-art NABL certified laboratory at Kolkata, that is equipped with modern testing equipment for examining electrical parameters, mechanical parameters, photometric parameters and electronic components of the luminaires. The products are tested as per IS 10322 \_ 1:2014, photometry tests are conducted as per CIE 121 & CIE S 025. The testing and research facility carries out high accuracy trials to achieve precise testing results for LED based luminaires.

The qualified product development, testing and research team works round the clock to offer technically superior and futuristic products for today's and tomorrow's generations.

### GLITZ-TR

Functional and stylish, track light from Eveready serves as both light source and art piece for your workplace. They allow you to design your own layout, creating a maze of straight lines, boxes, or curving or playful rails on the ceiling. The track light mounts on a support track in order to power the fixture and can be easily installed with simple screws and connected to existing electrical circuits, usually in the ceiling.

## Zebra Crossing Street Light

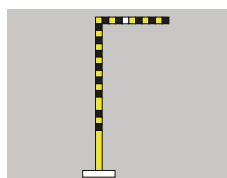

### ZEBRA CROSSING STREET LIGHT

LED street light for zebra crossing makes pedestrian's life safer. Considerable contrast & glare-free illumination ensures safety during night hours. Customised light distribution allows visibility of both pedestrian & crossing. It is made with a single piece pressure die-cast aluminium housing and has top opening driver compartment for easy maintenance. It has secondary optics and

individual high power LEDs for better light distribution & control. Similar looking one family design with IP 66 degree of protection and integrated driver with 5KV internal & 10KV external surge protection.

## Solar Street Light

### INTEGRATED SOLAR STREET LIGHT

Save energy with our new generation Integrated Solar Street Lights with integrated solar panel. It has lithium ion phosphate battery & high efficiency high power LEDs. The polycarbonate diffuser-cum-lens offers precise light distribution and control. The aluminium extrusion body acts as an excellent heat sink for better luminaire and LED life. Optional PIR motion detectors

add to extended battery life during non-peak hours of operation. The product comes with IP66 degree of protection and is supplied with attachments which can fit into existing poles, walls, offering greater flexibility for installation.

## FACADE LIGHT

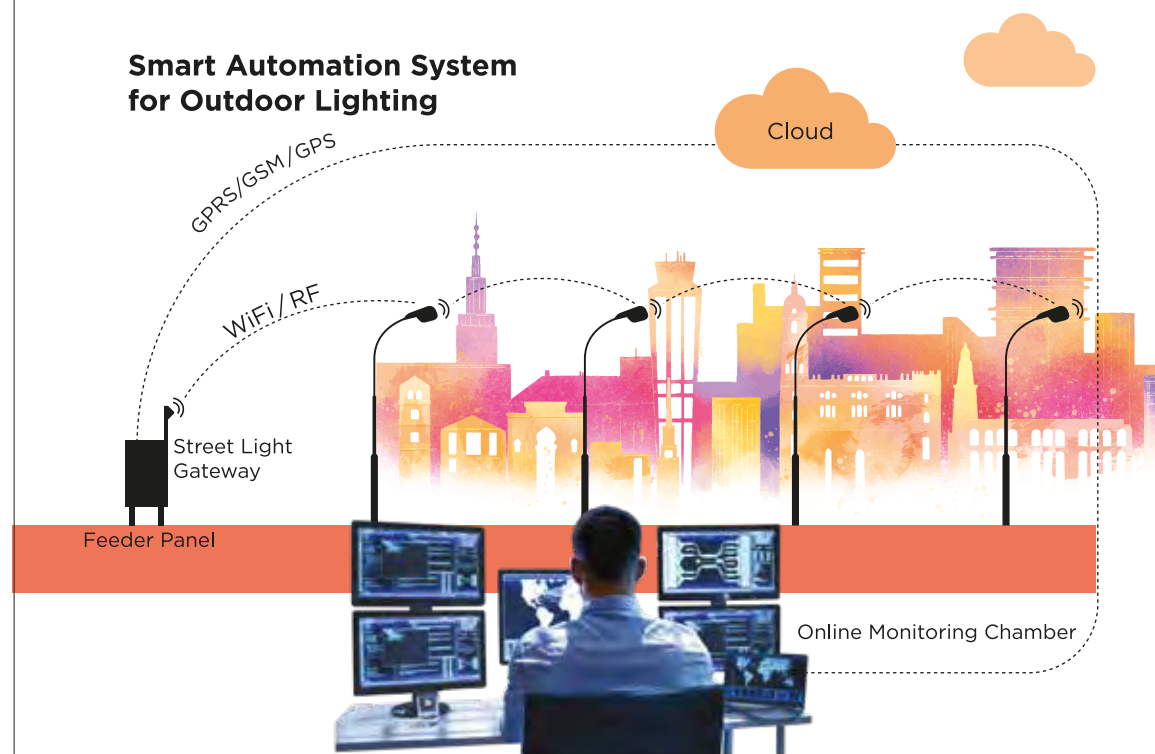

Eveready Facade Lighting is a premium LED lighting solution specially designed to enhance the looks of any building. Light draws attention to shapes, colours and textures of a space, helping architecture achieve its true purpose. Eveready Facade Lighting helps to highlight the construction and core features of a building, making it look more aesthetic, classic and elegant.

### Features :

- Dynamic Luminescence
- Energy Efficient
- Optimum & balanced illumination
- High optical clarity
- Sustainable

## Smart Automation System for Outdoor Lighting

## SMART LIGHTS FOR SMART CITIES

Street Lighting is essential to any growing city. Well-lit roads after sundown not only reduce the probability of accidents, but also go a long way in making people feel safe after dark. As we got busier, so did the city roads. Such evolved lifestyle demands an equally evolved street lighting system. Just like Eveready Centralized Control and Monitoring System with smart automation LED lighting.

## EVEREADY CCMS STREET LIGHTING

Keeping with the ever-evolving technology and trends in the lighting industry, Eveready has developed LED Street Lights with Centralized Control and Monitoring System (CCMS) for sustainable cities. Be it municipality roads, corporate parks, industrial parks or development authorities, CCMS helps you to remotely monitor and control street lights in a fail-proof way.

The system is based on GSM/GPRS/GPS and Zigbee technology, which connects to the server and enables data logging, monitoring and control. Now control your city's street lighting, set schedules, adjust light levels at any time from wherever you want.

## The Bright Side of CCMS

### Wireless technology

The complete system configuration and control can be achieved remotely through wireless technology.

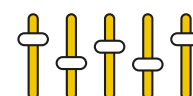

### Dimming intensity control

The intensity level of the group and individual street lights can be controlled instantly by pre-programming the intensity levels.

### Group dimming

Light network of the same cluster can be dimmed and switched on and off instantly by a single click from the dashboard.

### Configuration and control

Control individual or a group of lamp stands by setting date & time, intensity level, operation mode, and pre-programmed intensity.

### Remote monitoring

Street light status such as input voltage, system power, active energy, on-hours, operating mode, and intensity level can be monitored remotely via web application.

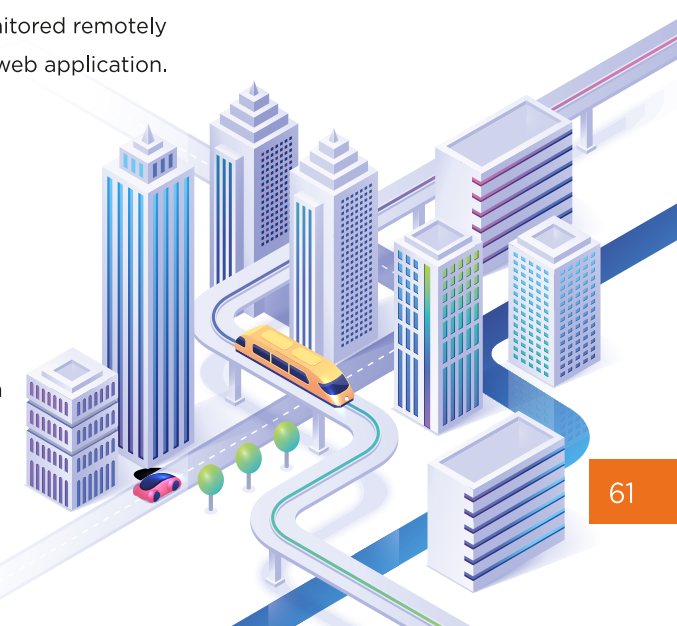

### Location maps

Google Maps tracking allows user to locate all the street lights from a single place.

### Alarms and alerts

Raises alert in case of any form of malfunctionings like-network down failures, group failures, excess voltage or current down and more.

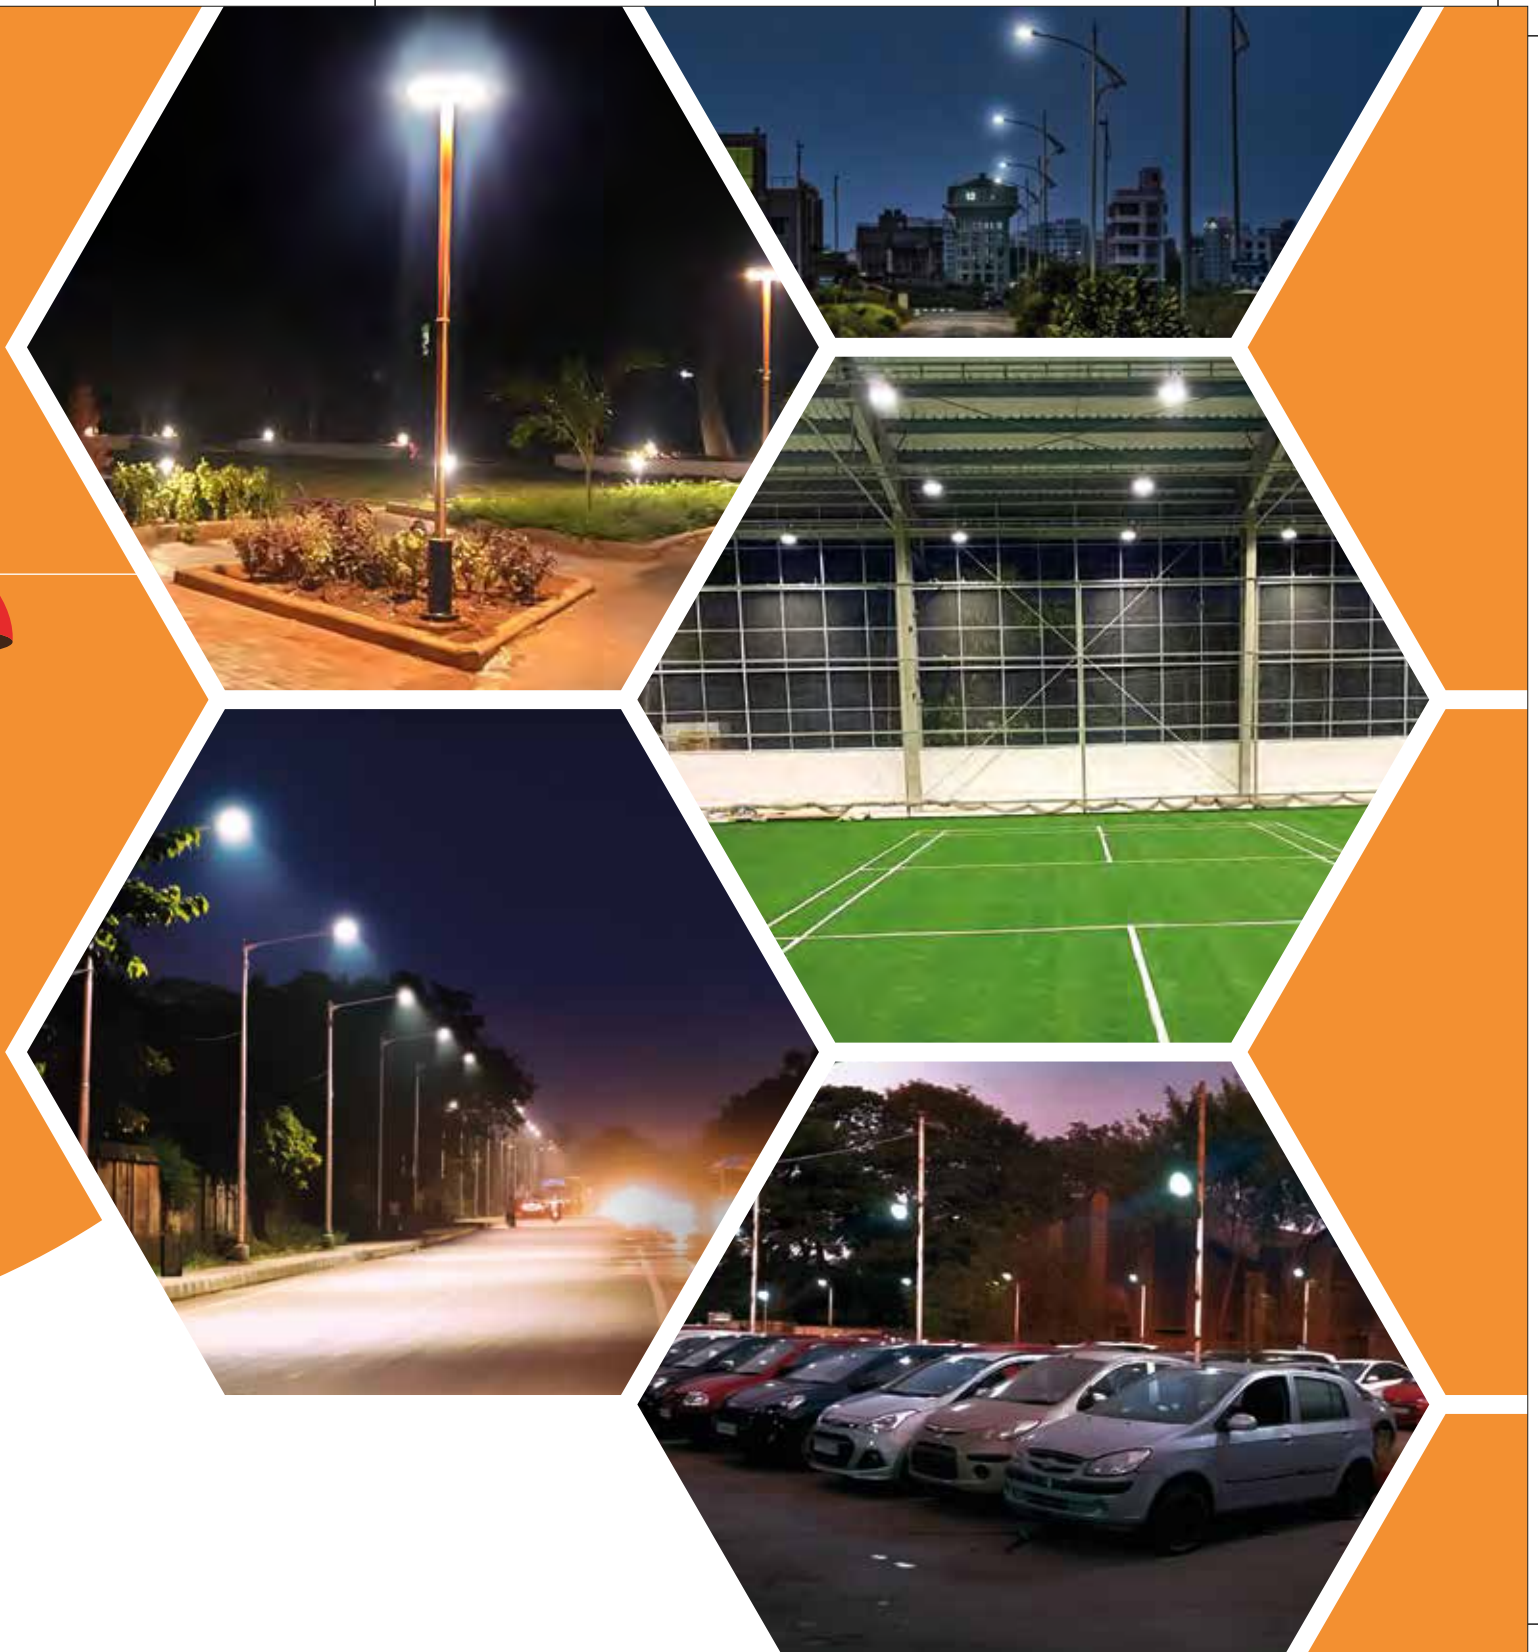

## Outdoor Lighting Installation

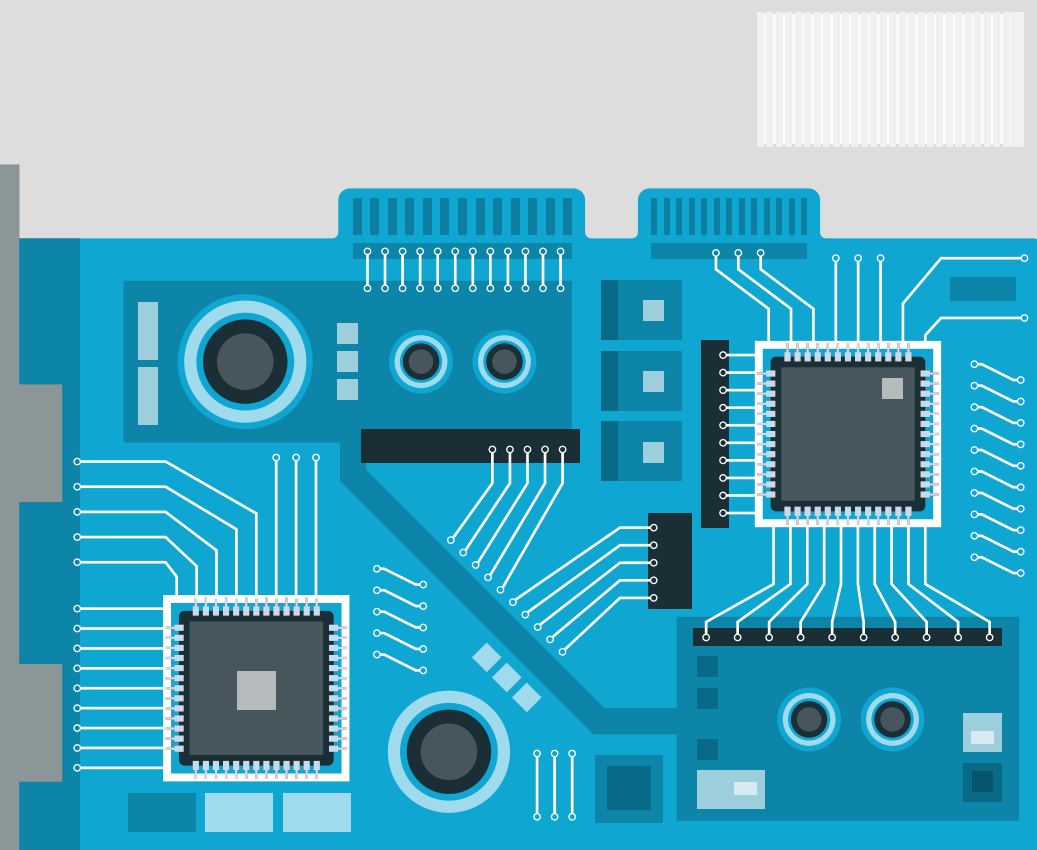

These are the actual installation  
photographs of our products.

## Drivers for LED Luminaires

LED INDOOR LUMINAIRE DRIVERS  
LED OUTDOOR LUMINAIRE DRIVERS

## Luminaire Drivers

### INDOOR LUMINAIRE DRIVERS
